 - [Facebook](#)
 - [W3Schools](#)
 - [Web Ground](#)
-

Section 1: Introduction to HTML

HTML stands for HyperText Markup Language. It is the standard language for creating webpages. HTML elements are represented by tags. The document's structure is defined using these tags.

Section 2: Advanced HTML Concepts

In this section, we dive deeper into attributes, anchor tags, and the bookmark system. Attributes provide additional information about HTML elements, while anchor tags allow for linking to both external and internal content.
